Eurand's commercially and clinically proven **Customized Drug Release** platforms offer flexible technology choices and a range of release profiles: sustained, pulsatile, chrono, and rapid onset. Advanced technologies such as Diffucaps® optimize efficacy via targeted delivery, improving compliance and therapeutic performance.

With our insightful development over four distinct platforms, Eurand has one of the broadest, most flexible and effective drug-delivery platforms in the industry.

Eurand's unprecedented advances in **Bioavailability Enhancement** technologies such as Biorise® and Diffucaps® can be applied to enable formulation of insoluble drugs (NCEs) and to improve the rate and extent of absorption of drugs from oral dosage. Our clinically proven technologies can be combined for the most effective drug formulations, with benefits including accelerated onset, lower dosages and decreased side effects.

With our insightful development over four distinct platforms, Eurand has one of the broadest, most flexible and effective drug-delivery platforms in the industry.

Eurand is the leader in clinically proven proprietary **Taste Masking and ODTs**. Our advanced orally disintegrating tablet technology—AdvaTab®—has proven bioequivalence to immediate release products, and can combine with customized release technology for more robust products. MicroCaps® offers numerous product solutions that may enhance compliance through excellent taste and mouthfeel and more convenient dosing.

With our insightful development over four distinct platforms, Eurand has one of the broadest, most flexible and effective drug-delivery platforms in the industry.
